  sources of, II, 4-12
  snow, II, 73
  water contaminated, II, 212
  welding fumes, II, 24
Aluminum plants, pollution near
  F^- in air, II, 25-32; 38-30; 44, 46
  F^- in animal tissue, II, 31; 58
  F^- in food, II, 26-27; 33
  F^- in forage, II, 49-59; 57; 72
  F^- in skin lesions, II, 26-27; 32-48
  F^- in urine, II, 58
  F^- in vegetation, II, 25; 30
  F^- in water, II, 31; 45
Arteries, calcification of, I, 96-97

Blood, F^- in welders, II, 17
  in fluorosis, I, 81; 92
Bones
  chemistry, II, 106-115; 147
  F^- content, I, 48; 56; 70; 92; II, 147; 218
Boron, in fertilizer, II, 222-235

Calcium
  balances, I, 82; II, 147; 190
  diet, low in, II, 142-152
  in arteries, I, 96-97
  in urine, I, 81
Cancer, II, 136-140
  due to air pollution, II, 189
  Dimethylaminoazobenzol, II, 85-90
Caries prevention
  endogenous theory, II, 117-118
  acid theory, II, 236-240
Cattle, fluorosis in, I, 41-49

Chizzola maculae, II, 32-48; 208
  epidemiology, II, 38; 43
  experimental, II, 49-54; 214-221
  in "neighborhood" fluorosis, II, 208
  near phosphate factory, II, 208
Chromosomes, F^- effect on, II, 76-84
Citrate metabolism, II, 106-122
Citrus groves, F^- effect on, II, 97-105
Corticosteroids, fluorinated, II, 191
Cryolite, II, 7

Dichapetalum cymosum, I, 9
Dimethylaminoazobenzene
  F^- substitution in, II, 85-90
Donora disaster, II, 1; 5; 62-70

Fish, F^- in, II, 71
Fluoride alleviators
  aluminum compounds, I, 49; II, 55-59
  low calcium diet, II, 142-152
Fluoride
  analysis, I, 2-8; 9-14; 16-18
  balance studies, II, 2
  content of
    bones, I, 48; 56; 70; 92; II, 20; 50-59; 218
    citrus leaves, II, 99
    fertilizer, II, 222-235
    food, II, 33; 210; 243
    fruit, I, 31
    plants, I, 27-33; II, 78-84; 222-228
    skin, II, 218
    soil, I, 76; II, 29-30
    tissue, II, 20
    urine, I, 15-20; 91
  effect on
    cancer cells, II, 157-166
    calcium, I, 38; II, 190
    chromosomes, II, 76-84
    enzymes, II, 168-175
    germination of seeds, I, 38
    heart muscle, II, 153-156
    infection, II, 176-180
    thrombocytes, II, 241-242
    thyroid, II, 192-205
    tissue cultures, II, 157-166
  errors in analysis, I, 2-8
  intake in humans, II, 36

Fluoride (continued)
intoxication, F^-
acute, I, 103-109; 110-112; 123; II, 64
liver damage in, II, 140-141
metabolism, I, 14
research, I, 55
uptake by domestic animals, I, 22
by plants, II, 33; 229
Fluoroacetate, II, 72
Fluorocitrate, II, 72
Fluorosis
bone chemistry, I, 70
blood, I, 81; 91
calcium balance, I, 82; II, 146-147
cattle, I, 41-49; 50-53; II, 55-59
dental effects, I, 66; 86-87
diagnosis, I, 122
drinking water constituents, I, 73-74; 84; 93; II, 142
endemic in
India (Nalgonda), I, 76-85; II, 200-205
India (Punjab), I, 65-75
Italy, I, 113-116
Sahara, I, 86-93
histopathology, I, 69; 92
in arteries, I, 96-97
in Hampshire, England, I, 117
in U.S.A., I, 94-102
laboratory findings, I, 91; 116
neighborhood, II, 2-3; 206-213
neurological manifestations, I, 72
occupational
(See aluminum, welding, phosphate fertilizer)
osteoporosis, I, 62
radiological changes, I, 56-64; 68-79
research on, I, 54
skeletal, I, 67-71; 87-91; 116; II, 120-124
incidence, I, 71
treatment, II, 142-152
symptomatology, II, 211-212
teeth, I, 86-87
thyroid, II, 195-205
wine, I, 56-64
Fluorspar, II, 7-8; 137

Food, F^- content, II, 210; 243

Heart
F^- effect on, II, 153-156
Hydrofluorosis
fatalities, I, 94-95
diagnosis, I, 99-101
in U.S.A., I, 94-102
thyroid function, II, 195-200
Hydrogen fluoride, II, 8; 78-84

Inflammation, II, 132-133
Inotropic action of F^-, II, 153-156
Intoxication (fluoride)
acute, I, 103-109; 110-112; 123; II, 64
histopathology, I, 104-106
mass intoxication, I, 123
tissue, F^- in, I, 107; 111

Kaschin-Beck disease, II, 128-131
Kenhardt disease, I, 119-121

Laboratory data in fluorosis, II, 51-54
Liver, damage by F^-, II, 140-141

Magnesium, II, 185-188
Metabolism
F^- transport, II, 91-96; 135; 235
free fluorine, II, 91-96
in blood
serum albumin, II, 91-96; 135; 235
Meuse Valley disaster, II, 62-70
Moles (fluoride)
conversion to ppm, II, 183-184

"Neighborhood" fluorosis, II, 2-3; 206-213
Neoplasm, II, 136-140
Nutrient solutions
fluoride in, I, 38

Osteolysis
periapical, II, 176-180
Osteoporosis
treatment with F^-, II, 125-127

Periodontal disease, I, 86; II, 149
Periostitis deformans, I, 56-64
Phosphate fertilizer
  factory, II, 97-101
  gypsum pond, II, 101-104
  phosphate rock, II, 8-9
Plants
  F^- content of, I, 23; 32; 43; II, 33; 99
  F^- effect on water balance, I, 39
  F^- uptake by, I, 27; II, 22-35
  tolerance to F^-, I, 37
Platelet
  function, II, 181-182; 241-242
Pot-cultures, F^- in, II, 226-227

Seepage water, F^- in, I, 24
Serum albumin, II, 91-96; 135
Serum fluoride, I, 92; II, 135
Soil, F^- content, I, 21-26; 30; II, 29-30
Succinic dehydrogenase
  F^- effect on, II, 168-175

Thrombocytes
  expansion, II, 241-242
Thyroid
  action by F^-, II, 192-205
  function in fluorosis, II, 195-200
  goiter in fluorosis, II, 200-205
Tissue
  experimental animals, II, 35
  F^- in, II, 20; 214
Tributyrinase, sensitive to F^-, II, 134
Trout, F^- in, II, 71
Tulips, F^- effect on, I, 34-36

Urine
  F^- in welders, II, 17, 18, 22
  in fluorosis, I, 91; II, 121, 123

Welding
  exposure to fumes, II, 19
  F^- in fumes, II, 24
  hazards in, II, 13-23
Wine fluorosis, I, 56-64
